

## 1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Given the dominance in Western cultures of naturalistic views of the body, the concept of the body in culture is ① potentially a difficult one to grasp. The bodies of accident victims, transplant patients and others ② undergoing cosmetic surgery are literally and physically reconstructed every day by surgeons. Such commonplace practices make ③ it relatively easy to think of the body as a machine. Like machines, bodies have components that can, up to a point, be taken apart and reassembled. The workings of the body can in similar fashion to other machine-like objects ④ be examined and malfunctions diagnosed and remedied. Mary Shelley's monster, literally constructed by Dr. Frankenstein, is the classical working out of the body-as-machine idea. So familiar are these ways of thinking about the body ⑤ which to some of us the ideas of the social construction of the body and of the body in culture may seem to be nonsense.

## 2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Before jeans were pants, *jean* was a cotton cloth used for making sturdy work clothes. The textile was produced in Genoa, Italy, ① which French weavers called *Genes*, the origin of our word "jeans." The origin of blue jeans, though, ② is really the story of Levi Strauss, an American immigrant tailor. When he arrived in San Francisco during the gold rush in the 1850s, he sold canvas for tents and covered wagons. A clever observer, he realized that miners went through trousers ③ quickly, so Strauss stitched some of his canvas into pants. Though heavy and stiff, the pants held up so well ④ that Strauss was in demand as a tailor. In the 1860s, he replaced canvas with denim. And Strauss discovered that dying neutral-colored denim pants dark blue to minimize soil stains greatly ⑤ increasing their popularity.

According to Nassim Taleb, author of the brilliant book *Black Swan*, we try to make sense of all the data around us because there are costs attached to information storage. So the more orderly we can make that information, the easier and less costly it is to store in our minds. This means that we prefer our data to be more ordered and less random. We have a drive to (A) increase/reduce the number of dimensions that we handle, so we place complex data into a much simpler order as a way to achieve this. Taleb considers that this is not only the purpose of narrative but also causality. We will try to attribute causality to events so that we can explain and understand, rather than leaving us to deal with the complexity and randomness of the world. And the purpose of (B) denying/imposing a narrative is that it can generate a sense of chronology, so both move in a single direction. The narrative means that we tend then to recall those facts that fit the story, that meet the requirements of the causality the narrative has perpetuated. We then don't recall the true sequence of events but a reconstructed one that makes the causality appear much more (C) complicated/straightforward than it was. [3점]

In November 2007, a team of researchers from the National Institute of Mental Health and McGill University announced that they had ① uncovered the specific deficits of the ADHD brain. The disorder turns out to be largely a developmental problem; often, the brains of children with ADHD develop at a significantly ② slower pace than normal. This lag was most obvious in the prefrontal cortex, which meant that these children literally lacked the mental muscles needed to resist tempting stimuli. The good news, however, is that the brain almost always ③ recovers from its slow start. By the end of adolescence, the frontal lobes in these children reached normal size. It's not a coincidence that their behavioral problems began to ④ emerge at about the same time. The children who had had the developmental lag were finally able to ⑤ counter their urges and compulsions. They could look at the tempting marshmallow and decide that it was better to wait.

There are difficulties that we cannot deal with right away, or perhaps ever. As well as remembering to have the patience to bear what cannot be changed, there are other ways of adjusting to seemingly impossible situations. Many spiritual teachers regard afflictions, trials, sufferings, and deprivations as “blessings in disguise” through which our inner spiritual powers are stimulated, purified, and ennobled. Confucius stated that “the gem cannot be polished without friction, nor man perfected without trials,” while Helen Keller wrote, “I thank God for my handicaps, for, through them, I have found myself, my work, and my God.” If we use them correctly, the failures, tests, and difficulties in our lives can become the means of purifying our spirits and strengthening our characters. A quote from ‘Abdu’l-Bahá illustrates this particularly well: “We should try to make every stumbling block a stepping stone to progress.”

- ① The more educated, the more civilized.
- ② Adversity can lead to achievement.
- ③ Do as you would be done by.
- ④ Cooperation works miracles.
- ⑤ Look before you leap.

**6. 다음 글이 시사하는 바로 가장 적절한 것은?**

In an experiment, two groups of mice were conditioned to feel fear in a certain location, and later the researchers put them back in that location to see if the mice showed fear. Interestingly, the mice whose eating schedule was shifted to the normal sleeping time felt fear less often in the fearful situation than their normal-schedule peers, suggesting the odd eating and sleeping schedule affected the animals' memory of scary situations. "The misaligned mice showed severe deficits in their recall of the training that they received," Colwell said. His research team previously found that jet lag has similar effects on memory in both human and mouse studies. The researchers also measured the strengthening of neural connections—a measure of learning in the brain. Not surprisingly, they found that the mice that ate during normal sleeping periods learned less quickly than the mice that ate at normal mealtimes.

**7. 다음 글이 함축하는 바로 가장 적절한 것은? [3점]**

Gal and Rucker recently conducted research where they used framing techniques to make people feel uncertain. For example, they told one group to remember a time when they were full of certainty, and the other group to remember a time when they were full of doubt. Then they asked the participants whether they were meat-eaters, vegetarians, vegans, etc., how important this was to them, and how confident they were in their opinions. People who were asked to remember times when they were uncertain were less confident of their eating choices. However, when asked to write up their beliefs to persuade someone else to eat the way they did, they would write more and stronger arguments than the group that were certain of their choice. The research was performed with different topics of preference (for example, desktop or laptop), and similar results were found.

- ① When people don't have a valid argument, they most likely start insulting others.
- ② People often become more confident in their beliefs when the majority of others disagree with them.
- ③ When people are less certain about their beliefs, then they tend to dig in and argue even harder.
- ④ As people get more information, they are able to look at the big picture, beyond their initial argument.
- ⑤ Opportunity, performance, and effectiveness jump to much higher levels when certainty outweighs uncertainty.

Gifted children, with their extreme emotional sensitivity and idealism, often notice great gaps between how things are and how they ought to be—in their family, their school, their community, and the larger world. ① Because of their keen minds and their sharp thinking and reasoning abilities, they find themselves sharply aware of mediocrity, greed, poverty, corruption, violence, abuse, pollution, hypocrisy, and other flaws in society. ② They become discouraged and disillusioned that no one else cares or that these problems can never be fixed. ③ They may feel relieved and act swiftly to conform to the social or behavioral norms of their age group. ④ As a result of this “What’s the point?” attitude, many intellectually gifted youngsters choose to underachieve in school, and some drop out of high school, college, or even society altogether. ⑤ They may search for a life or career where they don’t have to deal with social hypocrisy or other aspects of society that make them uncomfortable.

## 9. 다음 글의 제목으로 가장 적절한 것은?

When it comes to happiness, comparisons are rarely, if ever, helpful. Happiness is a subjective phenomenon; it is experienced differently by everyone and it means different things to different people. As the saying goes, one man's meat is another man's poison—our needs and desires vary, so what makes one person happy might not have the same impact on the next person. Although most of us realize the disparity between our individual requirements, it is easy to fall into the trap of looking over the fence, seeing what the neighbors have and thinking that we need that too. Simply put, this is unhelpful and almost certainly a direct path to unhappiness. Research strongly indicates that those who are happiest appreciate what they have and focus less on what they don't have. Long-term happiness studies clearly purport that, rather than judging themselves in relation to others, happy people simply clarify what's important to them and then focus on achieving and fulfilling their priorities.

\*purport 주장하다

- ① Avoid the Trap of Self-satisfaction
- ② Subjectivity Comes from Objectivity
- ③ Happiness Is Tailored to Each Person
- ④ Assess Yourself Through the Eyes of Others
- ⑤ The More You Achieve, the Happier You Will Be

## 10. 다음 글의 제목으로 가장 적절한 것은?

What is truly arresting about human beings is well captured in the story of the Tower of Babel, in which humanity, speaking a single language, came so close to reaching heaven that God himself felt threatened. A common language connects the members of a community into an information-sharing network with formidable collective powers. Anyone can benefit from the strokes of genius, lucky accidents, and trial-and-error wisdom accumulated by anyone else, present or past. And people can work in teams, their efforts coordinated by negotiated agreements. As a result, *homo sapiens* is a species, like blue-green algae and earthworms, that has made far-reaching changes on the planet. Archaeologists have discovered the bones of ten thousand wild horses at the bottom of a cliff in France, the remains of herds stampeded over the clifftop by groups of paleolithic hunters seventeen thousand years ago. These fossils of ancient cooperation and shared ingenuity may shed light on why saber-tooth tigers, mastodons, giant woolly rhinoceroses, and dozens of other large mammals went extinct around the time that modern humans arrived in their habitats. Our ancestors, apparently, killed them off.

## 11. 다음 글의 주제로 가장 적절한 것은?

Knowledge transfer has received a tremendous amount of publicity recently with advances in groupware and networking tools, designed to enable the flow of knowledge among groups and individuals. The goal of such tools is ultimately shared memory and understanding. In fact, this is difficult to achieve because knowledge is “sticky,” alive, and rich. It is “sticky” because it is very tightly bound to the context which gives it meaning; without context it is just information. Knowledge can be thought of as being alive in that it must be constantly attended to as it is ever-changing and growing. It also dies, goes out of date, becomes irrelevant and must be discarded, but who is its rightful steward? Lastly, it is rich in its multi-dimensionality, containing a tremendous amount of content, context, and experience. All three of these factors make it very difficult to distribute knowledge.

- ① protection of traditional cultural knowledge
- ② close relationship between knowledge and context
- ③ importance of experience as a source of knowledge
- ④ characteristics of knowledge that make its transfer difficult
- ⑤ easier knowledge distribution with information technology

**12.** Bertolt Brecht에 관한 다음 글의 내용과 일치하지 않는 것은?

Bertolt Brecht was a major influence on 20th century drama. He explored a new style of drama, using unusual staging and different styles of acting in order to achieve his aim of making audiences think about the moral and political implications of his plays. Brecht was born in Augsburg, Germany, and studied medicine and philosophy at the universities of Munich and Berlin. After serving in World War I, he achieved success with his play *Drums in the Night*. Throughout the 1920s and early 1930s he wrote many more plays. In 1933 Brecht and his wife were forced to flee from Germany after Hitler came to power. Brecht eventually reached America, but there he was investigated for having Communist beliefs. He left America and returned to East Berlin in 1947, where he founded The Berliner Ensemble, a theater company that became world famous.

- ① 독특한 연출 및 다른 연기 방식을 이용하여 새로운 양식의 연극을 탐구했다.

**13.** 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Every member of the family is an individual, as well as a part of the whole family. As a parent, you have to balance your role as a caregiver with your needs as an individual. If you sacrifice all of your time and energy to your family without finding a way to socialize with adults, to feel intellectually stimulated, or to maintain a healthy body and mind, the whole family will suffer. Remember: You're modeling adulthood for your children—don't create a martyr model of parenthood. Being an empty, self-sacrificing shell of a person is hardly the role model you want them to see. Of course, it's tough, if not impossible, to satisfy all of these needs to the fullest every single day. Parenting usually involves some level of self-sacrifice, but you need to strive for a healthy balance that works for you and your family.

\*martyr 순교자

- ⑤ 부모는 자녀에게 권리에는 책임이 따른다는 것을 가르쳐야 한다.

**14.** Romain Rolland에 관한 다음 글의 내용과 일치하지 않는 것은?

Romain Rolland was a French dramatist, novelist, and art historian who was awarded the Nobel Prize for Literature in 1915 as a tribute to the lofty idealism of his literary production. He was born at Clamecy, Nièvre in 1866. An excellent student, he entered the École Normale Supérieure, where he studied philosophy before gravitating toward the arts and music. After graduation in 1889, he spent several years in Italy studying the Italian masterpieces of the Renaissance. Upon his return to France, Rolland earned a doctorate in the study of early European opera in 1895. That same year, he earned a master's degree for a thesis on Italian oil paintings of the 16th century. He then taught at the university level until 1912, when he resigned his position to turn his full attention to writing. His greatest literary contributions came in the form of plays. He firmly believed that theater should be physically and intellectually welcoming to the masses. He favored plays that reminded audiences of France's revolutionary history.

## 15. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

The producers of manufactured foods have an advantage over farmers because they buy the farm output and have flexibility over what ingredients to use and where to source them. For example, the manufactured food requires a sweetener, but not necessarily sugar derived from the sugarcane plant. It requires oil, yet not necessarily oil from corn. It requires a starch, but that could be derived from a potato or wheat or a number of other grains. The production of potato chips provides a good example of this \_\_\_\_\_ effect: Producers can fry the chips in whatever oil is cheapest at the moment of production. This illustrates why farmers are often at a disadvantaged position within the agrofood system.

- ① integration                      ② substitution                      ③ conservation  
④ simplification                      ⑤ overconsumption

## 16. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Several historians declare that the foreign correspondent—the reporter covering events outside the country—is \_\_\_\_\_. This description applies to traditional mass media correspondents in particular. Since 1980, American networks have closed most of their overseas bureaus and have decreased their international news coverage. Neither the terrorism of September 11, 2001, nor the war in Iraq has reversed these trends. In a review of the year 2007, for example, the *Tyndall Report*, which monitors network television news, found that while the war in Iraq was the story of the year by a wide margin, the networks' foreign bureaus had their lightest workload since 2001. Economic pressures, global interdependence, and technological innovations—and a perception of public disinterest—have changed the way foreign news is reported and consumed.

## 17. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

If you live in a country like the United States, it is easy to say that population is the major problem for preserving the environment. But if you think about it a little more deeply, you could rapidly come to understand that consumption and the kinds of technology that we use are also very important in setting the stage for the world of the future. For example, people in rural Brazil or rural Indonesia, like most of their counterparts in developing countries, live at about one-fortieth of the consumption level of people in the United States. If you consider that we've added 135 million people to the population of the United States since the end of World War II, then you realize that the impact of the extra people in the United States on the world—in terms of levels of consumption, levels of pollution, uses of inappropriate technologies that may themselves be destructive—is about equal to the impact on the world of all the entire population of developing countries—4.2 billion people. It is not justifiable to say that population is the only factor. It's \_\_\_\_\_ that is truly significant. [3점]

- ① our way of dealing with the world
- ② our viewpoint on the welfare problem
- ③ humanitarian aid to developing countries
- ④ how to put an end to poverty and violence
- ⑤ how to measure the degree of economic equality

## 18. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Theodore Berger has achieved successes with \_\_\_\_\_ by using implanted chips to replace damaged parts of the hippocampus in rats. Berger and his team at the University of Southern California have succeeded in recording and transforming into computer code memories that have been stored for an extended period of time in the hippocampus of these animals. They had the rats perform a memory task. Then, they downloaded and transformed the memory of that task into digital code. Afterwards, they removed the section of the rats' hippocampus that carried these memories and replaced that bit of the brain with a special computer chip, onto which they reloaded the artificially stored memories. They found that the rats' memories could be fully restored using this technique.

\*hippocampus (뇌의) 해마상(狀) 용기

## 19. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

By examining the various functions of religion, we can see that religion is a(n) \_\_\_\_\_ force in a society. In a general sense religions support the status quo by keeping people in line through supernatural sanctions, relieving social conflict, and providing explanations for unfortunate events. Moreover, some of the major world religions, through both philosophical convictions and political interpretations, have tended to inhibit social change. To illustrate, orthodox Hindu beliefs, based on the notion that one's present condition in life is determined by deeds in past lives, have had the effect of making people so fatalistic that they accept their present situations as unchangeable. Such a worldview is not likely to bring about major revolutions or even minor initiatives for change. Likewise, some Muslim leaders have taken a strong stand against the introduction of new values and behaviors, particularly from the Western world.

① conservative

② democratic

③ impartial

④ intellectual

⑤ stimulating

## 20. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

To parents and the general public, class size seems to be the “litmus test” of the quality of a school. Schools with small class sizes are perceived as being better than schools with large class sizes. Surveys show that parents care more about class size than anything else except school safety.

- (A) Furthermore, discipline is much more difficult: for example, students may be able to doze in class without the teacher knowing it, and surely the teacher cannot correct every student who shows evidence of daydreaming.
- (B) After all, if a teacher has only fifteen or so students in a class, it is far more possible for that teacher to provide individual attention to each student. None will be left behind, and none will have to move forward on their own.
- (C) On the other hand, teachers of class sizes of thirty or so students simply cannot teach to each individual student. These teachers have huge numbers of papers to grade, grades to calculate, makeup work for students who are absent, parents to contact, and e-mails to answer.
- ① (A) - (C) - (B)                      ② (B) - (A) - (C)                      ③ (B) - (C) - (A)

That prompted the military to take the chemical-repelling technology that it had developed to protect soldiers against biological weapons and apply it to T-shirts and underwear.

Who knew that the largest number of casualties from Operation Desert Storm in the 1991 Gulf War would be from bacterial infections? Soldiers in combat don't always have the luxury of being able to change into fresh underwear, if they even *have* a clean pair to change into. ( ① ) Underwear worn day after day in those hot desert conditions turned out to be a significant cause of bacterial infections and discomfort. ( ② ) The underwear is manufactured by using microwave energy to bond tiny "nanoparticles" to the fibers in the underwear fabric. ( ③ ) Then chemicals that repel oil, water, bacteria, and other substances are bonded to the nanoparticles. ( ④ ) The result was underwear that is very, very difficult to get dirty, because virtually nothing will stick to it. ( ⑤ ) And because bacteria never gets established, undergarments made with the stuff can be worn for weeks without washing and without risk to the wearer's health. [3점]

23. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

That let him loosen the reins of command; with actors like Max von Sydow, he could just suggest what he had in mind and watch as the great actor brought his ideas to life.

Early in his career, the great Swedish film director Ingmar Bergman was often overwhelmed with frustration. ( ① ) He had visions of the films he wanted to make, but the work of being a director was so demanding and the pressure so immense that he would scold his cast and crew, shouting orders and attacking them for not giving him what he wanted. ( ② ) Some would stew with resentment at his dictatorial ways; others became obedient automatons. ( ③ ) With almost every new film, Bergman would have to start again with a new cast and crew, which only made things worse. ( ④ ) But eventually he put together a team of the finest camera operators, editors, art directors, and actors in Sweden, people who shared his high standards and whom he trusted. ( ⑤ ) Greater control could now come from letting go.

In a psychological study, researchers gave questionnaires to two groups of students and asked them to respond by email. All the questions had to do with some mundane task, such as opening a bank account. But the two groups were given different instructions for answering the questions. The students in the first group were to write about what the activity implied about some intangible information such as personal traits—what kind of person has a bank account, for example. The second group wrote simply about the specific steps in the process—speaking to a bank teller, filling out forms, making an initial deposit, and so forth. There proved to be a significant difference between the response times of the two groups. The students in the first group tended to delay—in fact, some never completed the task at all. By contrast, the students in the second group, who were focused on the how, when, and where of the task, completed the task sooner than the first group.

\*mundane 일상적인

In the study, the first group of students, who were given a task requiring thinking in more \_\_\_\_\_ (A) \_\_\_\_\_ terms, turned out to \_\_\_\_\_ (B) \_\_\_\_\_ their answers to a greater extent than the other group of students.

You never know when a so-called *bad idea* will contain the seeds of greatness within it. We've seen it countless times in our work. A *bad*, even absurd, idea is offered up, and within minutes it has transformed into a brilliant example of innovative thinking. We make use of some effective idea generation methods that invite participants to come up with the worst, most ridiculous, even distasteful ideas imaginable—and then to turn around or transform those ideas into great ones.

Consider the extreme “what if we all jumped out of the window” example. From this bad idea, you might develop an innovative emergency personal parachute product for individuals working in tall city buildings. Or conceive an improved process for evacuation from high floors during a fire. A new “team hang-gliding” extreme sports event. A breakthrough advertising concept where a group of people are able to fly after consuming a new beverage. An infinite number of other possibilities could be born from the bad idea that everyone in the room should jump out of a window. That is, unless the idea is shot down prematurely before the great idea within it has a chance to blossom. So, \_\_\_\_\_ until an idea has had a fair chance to show all it's got.

The trend which has impacted the application of the laws of armed conflict is the increasing civilianisation of modern conflict. This trend is taking place through a number of processes, including the escalating prominence of internal armed conflicts in which the majority of war fighters are civilians, and the (A) shift/removal of the conduct of hostilities into civilian population centres. In addition, modern militaries increasingly outsource support and even core functions to contractors—some of whom, like private military or security firms, are engaged in armed tactical roles.

In the three-and-a-half centuries since the Treaty of Westphalia, the nation state has been the defining actor in international relations, and has held the monopoly on power and military force. The emergence of transnational armed groups, the increasing number of non-international armed conflicts and the (B) reduction/expansion of the battlespace to encompass entire territories have all meant that civilians are involved in conflicts more than ever.

Militaries are also under pressure to downsize and reduce budgets. As part of this trend, civilian contractors and employees are increasingly used to augment defence forces as an easy and flexible way to maintain military strength according to constantly changing needs. Further, as weapons and equipment become more technologically advanced, civilians are (C) excluded/recruited to provide essential maintenance and support functions, sometimes from the ‘factory to the foxhole’. Civilians are an easy and less expensive way of maintaining access to the latest technical expertise; they can be hired when needed and discharged when the need is no longer urgent.

[29 ~ 30] 다음 글을 읽고, 물음에 답하시오.

(A)

It was summer and Mary was 14. Her whole family spent weekend after weekend at the river, waterskiing and swimming and just having a great time. But Mary couldn't ski like her big brothers and sisters. She was too embarrassed to try. (a) She was horrified at the idea of looking ridiculous, and looking like a novice next to her skilled and experienced siblings. One day she told her mother all about this.

(B)

On that day, Mary learned to ski. Her mother was patient and careful. It wasn't nearly as difficult as Mary had thought it would be, and with no audience (b) she had no discomfort about being hunched over her skis. As the afternoon wore on, she stood up straighter and straighter on the skis. The next weekend river trip would see Mary happily skiing along with her brothers and sisters, (c) her embarrassment erased by her mother's kind act.

(C)

Mary explained that when beginning skiers got up out of the water for the first time, they started off crouched over their skis with their bottoms stuck out, looking absolutely absurd. And there were so many people on the river on any sunny weekend. Some of them were boys, and they would all see Mary as (d) she adopted that humiliating pose. Mary told her mom that she was not willing to risk this shame.

(D)

One Thursday soon after this talk, Mary's mother left work after lunch and came home. Mary didn't understand why her mom was home, but Mary's mom just told her to help hook the boat trailer to the car. Her mother was offering something, and Mary had to accept (e) her offer. Before she knew what had happened, Mary and her mom were in the boat, heading up the river in the warm sunshine on quiet water. It was a Thursday, so no one else was about. No one was there to see Mary look ridiculous.

29. 주어진 글 (A)에 이어질 내용을 순서에 맞게 배열한 것으로 가장 적절한 것은?

- ① (B) - (D) - (C)                      ② (C) - (B) - (D)                      ③ (C) - (D) - (B)  
 ④ (D) - (B) - (C)                      ⑤ (D) - (C) - (B)

30. 밑줄 친 (a)~(e) 중에서 가리키는 대상이 나머지 넷과 다른 것은?

- ① (a)                      ② (b)                      ③ (c)                      ④ (d)                      ⑤ (e)
