

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

The triumph of antibiotics over disease-causing bacteria is one of modern medicine's greatest success ① stories. Since these drugs first became widely used in the World War II era, they have saved countless lives and ② blunted serious complications of many feared diseases and infections. After more than 50 years of widespread use, however, many antibiotics don't have the same effect that they once ③ were. Over time, some bacteria have developed ways to outwit the effects of antibiotics. Widespread use of antibiotics is thought to have spurred evolutionary changes in bacteria ④ that allow them to survive these powerful drugs. While antibiotic resistance benefits the microbes, it presents humans with two big problems: it makes it more ⑤ difficult to purge infections from the body; and it heightens the risk of acquiring infections in a hospital.

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

In a survey, when the response options are presented visually, it seems reasonable to assume that respondents typically start at the top of the list and ① work their way through the remaining options in order. Primacy effects would, therefore, seem to be the rule: Respondents will tend to prefer options at the beginning of the list over ② those at the end. However, the picture becomes somewhat murkier when the interviewer reads the response options to the respondent. Survey interviewers tend to read questions ③ quickly so that respondents will not generally have time to evaluate the first option before they must turn to the next. It is quite likely that respondents will begin by considering the final option, since that option is the one that will remain in working memory when the interviewer stops ④ to read. Consequently, we should expect recency effects – the tendency to choose options at the end of the list – when the question ⑤ is presented aloud to the respondent. [3점]

3. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Stop-motion photography is used to fool the eye into seeing motion. A still photograph is made of an object, such as a clay model of a dinosaur. The object is moved (A) considerably / slightly and another photograph is taken. This delicate process is repeated thousands of times. When the photographs, or frames, are shown at the speed of a motion picture camera, 24 frames per second, the clay model appears to be (B) resting / moving. A major problem with stop-motion filming is that there are no “blurs.” If you film a man running down the street, there will be a slight blur on each frame. Although not noticed by the audience, the blur helps make the running motion smooth and realistic. In stop-motion films, a running creature seems to have jerky movements. This problem has been solved with computer animation, which can be used to make frames (C) blurry / jerky to produce realistic movement.

- | | (A) | | (B) | | (C) |
|---|--------------|-------|---------|-------|--------|
| ① | considerably | | resting | | blurry |
| ② | considerably | | moving | | jerky |
| ③ | slightly | | resting | | blurry |
| ④ | slightly | | resting | | jerky |
| ⑤ | slightly | | moving | | blurry |

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Modern technology has provided us with countless time-saving devices. Cell phones with headsets (A) allow / forbid people to talk to friends or colleagues and battle rush hour at the same time. In a matter of seconds a computer can perform calculations that would take months if done by hand. Nonetheless, most of us complain about not having enough time. Surveys suggest that a majority of people subjectively feel that they have less and less time for themselves. Time has become a truly (B) common / precious commodity; one national survey found that 51% of the adult respondents would rather have more time than more money. Part of the problem is that in our modern society, work follows people home. Thus, people find themselves bound to their jobs around the clock by the same nomadic tools—cell phones, tablets, wireless e-mail—that were heralded first as instruments of (C) constraint / liberation. To deal with this time crunch, more and more people are cutting back on their sleep as they attempt to juggle work, family, and household responsibilities. [3점]

- | | (A) | | (B) | | (C) |
|---|--------|-------|----------|-------|------------|
| ① | allow | | precious | | liberation |
| ② | allow | | precious | | constraint |
| ③ | allow | | common | | liberation |
| ④ | forbid | | common | | constraint |
| ⑤ | forbid | | precious | | constraint |

Most people have two potentially opposing needs: one is to be available to others for social contact; the other is to have privacy. Some people need more privacy, others more social contact. If we think about the environment, whether at the level of public spaces or domestic spaces, we can see features which reflect these two needs. In western society the door is a ubiquitous architectural feature, and curtains are almost obligatory parts of our domestic props. The possibility of closing or opening doors and curtains is a device for signalling availability. Goffman has drawn attention to the prevalence of back (private) regions and front (public) regions both in domestic settings and in public settings. Back regions, which in houses include bedrooms, bathrooms and sometimes kitchens, are regions in which only intimates may penetrate without invitation. Front regions are open to the public. [3점]

- ① 현대사회는 사생활보다 사회생활을 중시한다.
- ② 사생활에 대한 인식과 중요성은 문화마다 다르다.
- ③ 사생활과 사회생활의 구분이 점차 희미해지고 있다.
- ④ 가정이 사회생활의 장이 되는 것은 바람직하지 않다.
- ⑤ 생활공간에는 사생활과 사회생활에 대한 필요가 반영된다.

When historians look at this period, they're going to conclude that we're in a different type of revolution: a revolution in war, like the invention of the atomic bomb. But it may be even bigger than that, because our unmanned systems don't just affect the "how" of war-fighting, but they affect the "who" of fighting at its most fundamental level. That is, every previous revolution in war, be it the machine gun or atomic bomb, was about a system that either shot faster, went further, or had a bigger boom. That's certainly the case with robotics, but they also change the experience of the warrior and even the very identity of the warrior. Another way of putting this is that mankind's 5,000-year-old monopoly on the fighting of war is breaking down in our very lifetime. It is likely that the effects of this may ripple outwards over time, substantially changing the very direction of human development, our society, our laws and our ethics, etc. [3점]

- ① Robotics is bringing about a revolution in warfare whose effects reach far into society.
- ② Unmanned systems are the only way to save human soldiers from the battlefield.
- ③ Robotics, which is developing rapidly, will eventually bring an end to warfare.
- ④ There will be little change in the way wars are fought.
- ⑤ Governments must make robotics investment a priority.

The melting pot view of society has some appeal, because it suggests that everyone can succeed if only they try hard enough. However, at some point we should realize that this type of equity usually means eliminating differences and variety. The melting pot ideal generally requires that an individual sacrifice his or her uniqueness to fit into an existing system. The only way to become successful, at least in a socially acceptable fashion (as opposed to becoming a famous gangster), requires developing ways to fit in while giving up on one's cultural background. We use the idea of the melting pot as a way to blend different ingredients, but we should recognize that the result of this melting pot is a homogeneous product wherein distinctive features are diluted. In short, the melting pot metaphor reflects a desire for _____.

- ① diversity ② challenge ③ sameness
④ originality ⑤ independence

8. 다음 글에서 전체 흐름과 관계 없는 문장은?

MSG is essentially a concentrated form of sodium, which is extracted from seaweed, beets, and grains. ① The Glutamate Association insists that MSG is perfectly safe. ② They argue that MSG is no different from the glutamate that is liberated by our bodies when we eat food protein, and that MSG added to food represents only a small fraction of the glutamate contained naturally in most foods. ③ For many of the same reasons, a number of chefs dislike MSG, believing that it deadens the taste of foods and is too often used to compensate for inferior products. ④ For example, most recipes call for half a teaspoon of MSG per pound of meat. ⑤ With these proportions, the MSG in a serving of chicken would constitute less than 10 percent of the glutamate already found in the chicken.

*glutamate 글루타민산염

According to explanatory critical theories of capitalism, crises occur when the inherent contradictions of capitalism lead to imbalances, i.e. the loss of the balances (e.g. between what is produced and what is consumed) which are necessary for the existing system to continue to function. Crises are not only inevitable but also necessary, for when imbalances develop, people have to impose some order on a situation of collapse and chaos. We can say that crises have a rationalizing function, the function of restoring rationality where it has been undermined. In Harvey's words, crises are "the irrational rationalisers of an always unstable capitalism." Crises have an objective or systemic aspect, but they also have a necessary and indeed crucial subjective aspect, which is agentive and strategic. In a crisis, people have to make decisions about how to act in response and to develop strategies for pursuing particular courses of action or policies which will hopefully restore balance and rationality.

"Children's playing is not sport and should be considered their most serious action," Montaigne, a sixteenth-century essayist, wrote. If we wish to understand our child, we need to understand his play. Freud, a founder of modern psychology, regarded play as the means through which a child expresses himself. He also noted how much and how well children express their thoughts and feelings through play. From a child's play we can gain understanding of how he sees and interprets the world – what he would like it to be, what his concerns and problems are. A child does not play spontaneously only to while away the time, although the adults observing him may think he does. Even when he engages in play partly to fill empty moments, what he chooses to play at is motivated by inner processes, desires, problems, anxieties.

Religion can exert strong influences over commerce. In medieval Europe, for example, the Christian Church was strongly opposed to money-lending at interest, and because Jews were not bound by these religious rules they took on the role of money-lenders. Until quite recently, banking institutions have not developed among Muslims because the Prophet prohibited acceptance of interest from borrowers. On the other side of the coin, literally, are the vast sums of money exchanged by religious pilgrims to holy sites. Pilgrimage plays a significant role in the economy of religious centres such as Mecca in Saudi Arabia, Lourdes in France, and Banaras in India. Religion can also strongly influence what type of employment a person has, particularly in Hindu society where caste prescribes certain duties and occupations by birthright rather than suitability.

*pilgrim (성지) 순례자

- ① how economic boom supports religion
- ② geographical features of religious centres
- ③ significant impact of religion on economy
- ④ pilgrimage as the heart of religious activity
- ⑤ why different religions exist in different regions

12. 러시아 문학에 관한 다음 글의 내용과 일치하지 않는 것은?

During the century that it has existed in adequate English translation, the Russian canon of novels and plays has acquired a reputation and a certain “tone.” It is serious (that is, tragic or absurd, but rarely lighthearted and never trivial), somewhat preacherly, often politically oppositionist, and frequently cast in a mystifying genre with abrupt or bizarre beginnings and ends. The novels especially are too long, too full of metaphysical ideas, too manifestly eager that readers not just read the story for fun or pleasure but learn a moral lesson. These books are deep into good and evil even while they parody those pretensions. If there is comedy, there is a twist near the end that turns your blood to ice. Russian literary characters don’t seek the usual money, career, success in society for its own sake, trophy wife or husband, house in the suburbs, but instead crave some other unattainable thing.

*canon 진짜 작품(목록)

- ① 소설과 희곡은 명성을 얻었다.
- ② 소설과 희곡은 다소 설교적인 색채를 띤다.
- ③ 소설은 도덕적 교훈을 배제하고 즐거움을 추구한다.
- ④ 희곡의 끝부분에서는 뜻밖의 전개가 일어난다.
- ⑤ 문학작품의 등장인물은 얻기 어려운 것을 갈망한다.

15. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

The problem that many of us face is that we have great dreams and ambitions. Caught up in the emotions of our dreams and the vastness of our desires, we find it very difficult to focus on the small, tedious steps usually necessary to attain them. We tend to think in terms of giant leaps toward our goals. But in the social world as in nature, anything of size and stability grows slowly. The piecemeal strategy is the perfect antidote to our natural impatience: it focuses us on something small and immediate, a first bite, then how and where a second bite can get us closer to our ultimate objective. It forces us to think in terms of a process, a sequence of connected steps and actions, no matter how small, which has immeasurable psychological benefits as well. Too often the magnitude of our desires overwhelms us; _____ makes them seem realizable. There is nothing more therapeutic than action.

*antidote 해독제, 교정수단

Anxiety, believe it or not, _____. For you are born and raised with desires, preferences, and goals, and if you had no anxiety whatever, and were totally unconcerned about achieving your desires, you would tolerate all kinds of obnoxious things and would do nothing to ward them off or escape from them. Anxiety, basically, is a set of uncomfortable feelings and action tendencies that make you aware that unpleasant happenings—meaning things that go against your desires—are happening or are likely to happen and warn you that you'd better do something about them. Thus, if you are in danger of being attacked, and you desire to remain unhurt, you have a choice of several possible actions, such as running away, fighting off your attacker, calling the police, and so on. But you would probably do none of these things unless you were concerned, watchful, anxious, tense, cautious, vigilant, or panicked. You would perceive the danger of the attack, perhaps, but do nothing about it. [3점]

What we call “mind” and what we call “body” are not two things, but rather aspects of one ____ (A) ____ process, so that all our meaning, thought, and language emerge from the aesthetic dimensions of this embodied activity. Chief among those aesthetic dimensions are qualities, images, patterns of sensorimotor processes, and emotions. For at least the past three decades, scholars and researchers in many disciplines have piled up arguments and evidence for the embodiment of mind and meaning. However, the implications of their research have not entered public consciousness, and so the denial of mind/body dualism is still a highly provocative claim that most people find objectionable and even threatening. Coming to grips with your embodiment is one of the most profound philosophical tasks you will ever face. Acknowledging that every aspect of the human mind is ____ (B) ____ specific forms of bodily engagement with an environment requires a far-reaching rethinking of who and what we are, in a way that is largely at odds with many of our inherited Western philosophical and religious traditions. 19. 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Perhaps the most important dimension of the way that we think about ourselves is that of evaluation, that is our level of self-esteem. The degree to which we globally approve of ourselves has an impact on how we behave, particularly with other people. To a certain degree our evaluations of ourselves are dependent on comparisons with other people. For example, in judging specific abilities our judgements can really only be relative: the question of how good a tennis player/musician/cook one is can only be meaningful with reference to a scale derived from other people's performances. There is ample evidence that we look for opportunities to compare ourselves with relevant others. By *relevant* we mean others who are likely to be sufficiently close to us in terms of some overall scale for the comparison to be meaningful. For example, the local tennis club provides a more meaningful set of comparisons about our tennis skills than international championships would.

- ① damaging effects of over-focusing on competition
- ② role of relevant comparison in self-evaluation
- ③ importance of having high self-esteem
- ④ development of a competitive spirit
- ⑤ sports as a measure of self-worth

20. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Pesticides are an important component in pest management strategies for food production and public health. Despite their importance, these chemicals are often blamed for environmental pollution.

- (A) In fact, few other chemicals commonly used by our society are more closely scrutinized. Moreover, insects can develop resistance with frequent applications of pesticides.
- (B) Therefore, in order to use pesticides safely and effectively, not only must we know which pesticides to use in specific conditions, but we must also understand all biological, physiological, and environmental consequences.
- (C) All of these issues have changed pest control from a simple task in the old days into the complex, publicly-sensitive operation of today. People who develop and supervise modern pest control methods must be highly trained in many areas of pesticide usage.

- ① (A) - (C) - (B) ② (B) - (A) - (C) ③ (B) - (C) - (A)
- ④ (C) - (A) - (B) ⑤ (C) - (B) - (A)

I was never a dog person. I'd even say I hated them. That was, until one day I found a pathetic ball of fur cowering under my car. It was a scared little dog. It looked as if she hadn't eaten or bathed in weeks.

- (A) I had to go on a business trip the next day, but she was too weak to be left alone, so I asked a friend to watch her. When I got back I ran to pick her up, but apparently she had "escaped." I scoured the neighborhood through the night but came up empty.
- (B) I made up posters with her description and my phone number, and put them up around the area. But nothing for over a week. Until finally, the phone rang. She was returned to me and we haven't been apart since. Needless to say, my feelings on dogs have drastically changed.
- (C) She was so scared that I couldn't get her to come out, so I crawled under there and snatched her. And that's when it happened. She snuggled up to me. From that moment the bond was made; she was mine, my responsibility, my best friend.

- ① (A) - (C) - (B) ② (B) - (A) - (C) ③ (B) - (C) - (A)
- ④ (C) - (A) - (B) ⑤ (C) - (B) - (A)

22. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

And this will not ever go away—not now, not in the twenty-second century, not in a thousand years: *All leaders die.*

In looking at the charismatic leader model, we think the world is heading in exactly the opposite direction. Just look at the twenty-first century. Nearly the entire world has moved toward democracy. (①) The very essence of democracy is to avoid overdependence on any single leader and put the primary focus on the process. (②) Even Churchill—perhaps the single greatest leader of the last century—was secondary to the nation and its processes, kicked out of office at the end of World War II. (③) Hitler, Stalin, Mussolini—these were charismatic leaders who did not understand that they were fundamentally *less* important than the institutions they served. (④) And even if you don't buy the analogy between the shift to democracy and the evolution of corporations, the great charismatic leader model has one fundamental flaw. (⑤) To transcend this unchanging reality of human mortality, the focus must be first and foremost on building the characteristics of the organization, instead of being a great charismatic leader.

23. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

If there is disagreement or confusion at this stage, it is unlikely that the ensuing encounter will be fruitful.

In many interpersonal transactions, one encounter is influenced by decisions made and commitments undertaken in the previous meeting. (①) Again, it is important to establish that all parties are in agreement as to the main points arising from prior interactions and the implications of these for the present discussion. (②) This problem is formally overcome in many business settings, where minutes of meetings are taken. (③) The minutes from a previous meeting are reviewed, and agreed at the outset, before the main agenda items for the current meeting are discussed. (④) This procedure ensures that all participants are in agreement about what has gone before, and have therefore a common frame of reference for the forthcoming meeting. (⑤) In addition, agenda items are usually circulated prior to the meeting, and this in itself is a form of cognitive set, allowing individuals to prepare themselves for the main areas to be discussed.

24. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A)와 (B)에 들어갈 말로 가장 적절한 것은?

Many teenagers want to be like everyone in the school lunchroom. “We are not as unique as we would like to think,” said Erica van de Waal, who conducted a study on monkey behavior. “We can find many of the roots of our behaviors in animals.” Her study team gave 109 vervet monkeys, living in groups in the wild, food tinted pink or blue. One color for each group was tainted with aloe to give it a bad flavor, but only for the first few meals. Even after the flavor returned to normal the monkeys would not eat the color that they thought was bad. Then some blue-eating monkeys went to the pink-eating tribes and some pink-eating monkeys went to the blue-eating tribes. That is when the researchers saw peer pressure in action. The blue-food eaters that moved to an area full of pink-food eaters switched even though they had avoided pink food before. Pink eaters also changed when they moved to a blue-food area. They ate what everyone else ate.

The vervet monkeys' act of _____ (A) _____ is thought to be a result of _____ (B) _____ in a new group.

- | (A) | | (B) |
|--------------------|-------|-------------------|
| ① switching food | | social conformity |
| ② switching food | | food abundance |
| ③ refusing to eat | | power struggle |
| ④ refusing to eat | | food abundance |
| ⑤ avoiding contact | | social conformity |

In later life, Arthur Rimbaud was an anarchist, businessman, arms dealer, financier, and explorer. But as a teenager, all (a) he wanted to be was a poet. In May 1871, the sixteen-year-old Rimbaud wrote two letters, one to Georges Izambard, (b) his former teacher, and one to Paul Demeny, a publisher he was keen to impress. Rimbaud waited around for Izambard every day, palely hanging around outside the school gates, eager to show the young professor his most recent verse. He also presented Demeny with copies of his work, accompanied by notes in which (c) he spoke about his poems and dropped heavy hints that he wanted to see them in print. In the letter to Demeny, Rimbaud outlined his vision for a new kind of poetry. “A Poet makes himself a visionary,” Rimbaud lectured (d) him, “through a long, boundless, and systematized disorganization of all the senses.” Only that, Rimbaud argued, could create a language that “will include everything: perfumes, sounds, colors, thought grappling with thought.” (e) His poetic program involved upsetting conventional orders of perception, deranging habitual ways of seeing, hearing, smelling, touching, and tasting, and rearranging them in novel combinations. Fresh, vivid, and sometimes shocking images resulted when sense impression jostled sense impression, when thought grappled with thought.

- ① (a) ② (b) ③ (c) ④ (d) ⑤ (e)

28. 위 글의 “Arthur Rimbaud”에 관한 내용과 일치하지 않는 것은? [3점]

- ① He worked in fields unrelated to literature as an adult.
 ② He wanted to be a poet as a teenager.
 ③ He acquired his own unique vision for poetry from his teacher.
 ④ He hoped his poems would be published.
 ⑤ His poetic images were based on a conflict of senses or thoughts.

[29~30] 다음 글을 읽고, 물음에 답하시오.

Humans deliberately make and remake their social networks all the time. The primary example of this is *homophily*, the conscious or unconscious tendency to associate with people who resemble us (the word literally means “love of being alike”). Whether it’s stamp collectors, coffee drinkers, or bungee jumpers, the truth is that we seek out those people who share our interests, histories, and dreams. As the saying goes, “

But we also choose the *structure* of our networks in three important ways. First, we decide how many people we are connected to. Do you want one partner for a game of checkers or many partners for a game of hide-and-seek? Do you want to stay in touch with your crazy uncle? Second, we influence how densely interconnected our friends and family are. Should you seat the groom’s college roommate next to your bridesmaid at the wedding? Should you throw a party so all your friends can meet each other? Should you introduce your business partners? And third, we control how central we are to the social network. Are you the life of the party, mingling with everyone at the center of the room, or do you stay on the sidelines?

Diversity in these choices yields an astonishing variety of structures for the whole network in which we come to be embedded. And it is diversity in these choices that places each of us in a unique location in our own social network. Of course, sometimes these structural features are not a matter of choice; we may live in places that are more or less conducive to friendship, or we may be born into large or small families. But even when these social-network structures are thrust upon us, they still rule our lives.
